BUG-06

Projects of a todo that doesn't exist come back with 200

Executive Summary
GET /todos/999/tasksof returns 200 and unrelated projects instead of 404

Pre-Conditions
API running on localhost:4567 with the default data. Project 1 "Office Work" has todos 1 and 2 as tasks. Todo 999 doesn't exist.

Steps to Reproduce
1. GET http://localhost:4567/todos/999 and check it gives 404.
2. GET http://localhost:4567/todos/999/tasksof (Accept: application/json).
3. Do step 2 again with Accept: application/xml.
4. HEAD http://localhost:4567/todos/999/tasksof.

Bug Description
Expected: 404 saying todo 999 doesn't exist, same as step 1.
Actual: 200 with a list of projects. From what I can tell it returns one entry for every todo-project link in the system, so with the default data "Office Work" shows up twice (it has 2 tasks). XML does the same thing and HEAD also gives 200. None of these projects have anything to do with todo 999.

Reproduced after the session (Oct 18, ~8:30 PM EDT; any Date header shown is in GMT)

Frequency
Reproduced consistently for the nonexistent IDs tested

Potential Impact
High. A client with a wrong or old todo id gets real data from other todos with a 200, so it can't tell anything went wrong and could show the user the wrong projects.

Notes
Same kind of problem Olivia found on the projects side (BUG-01 / BUG-02). Found at 7:01 PM in session 1. Unit tests: BUG-06 SPEC EXPECTED (fails) and BUG-06 OBSERVED (passes).
